International Journal of Production Economics, 28 (1992) 359–360
Elsevier

Contents Volume 28

Vol. 28, No. 1 (November 1992)

Kitting versus line stocking: A conceptual framework and a descriptive model
Y.A. Bozer (Ann Arbor, MI, USA) and L.F. McGinnis (Atlanta, GA, USA) 1
EOQ type formulations for controlling repairable inventories
M.C. Mabini, L.M. Pintelon and L.F. Gelders (Leuven-Heverlee, Belgium) 21
Competitive incentives for manufacturing flexibility
M.A. Waller and D.P. Christy (University Park, PA, USA) 35
The "Orchard" scheduler for manufacturing systems
R.J. Wittrock (Yorktown Heights, NY, USA) 47
Productivity measurement in multi-product manufacturing firms: Evaluation and control through sensitivity analysis
P.K. Ray and S. Sahu (Kharagpur, India) 71
Optimal production policy for a single-product single-machine problem with intermediate machine inspection allowed
C.S. Sung and Y.S. Ock (Seoul, South Korea) 85
Consensus and conflicts in understanding productivity
R.P. Mohanty (Bombay, India) 95

Forum
Integrating design and production: A case study of the naval submarine program
T.J. Eccles and H.S. Marcus (Cambridge, MA, USA) 107

Book Reviews 127
Diary of Events 129

Vol. 28, No. 2 (November 1992)

The future factory: Challenge for one-of-a-kind production
E. Eloranta (Espoo, Finland) 131
Production control in a kanban-like system with defective outputs
Y.-J. Lee and P.H. Zipkin (New York, NY, USA) 143
Product mix selection and closed manufacturing cell flow time performance
R.H. Deane (Atlanta, GA, USA) and J. Yang (Grand Forks, ND, USA) 157
A note on economic process levels under acceptance sampling by variables
T.O. Boucher and M.A. Jafari (Piscataway, NJ, USA) 171
Multi-item inventory policy under limited storehouse capacity
K. Matsuyama (Tokyo, Japan) 175
Modeling the Deep Space Network costs for future space missions by using major cost drivers
D.S. Remer (Pasadena, CA, USA), J.S. Sherif (Fullerton, CA, USA) and H.R. Buchanan (Pasadena, CA, USA) 193
A note on optimal order quantities for credit purchases
R.L. Bregman (College Station, TX, USA) 203
Parameter estimation and performance measurement in lost sales inventory systems
R.M. Hill (Exeter, UK) 211
The pallet loading problem: A survey
B. Ram (Greensboro, NC, USA) 217
Multi-attribute decision model using the analytic hierarchy process for the justification of manufacturing systems
V. Datta, K.V. Sambasivarao, R. Kodali and S.G. Deshmukh (New Delhi, India) 227
The economic lot and delivery scheduling problem: The single item case
J. Hahm (Seoul, South Korea) and C.A. Yano (Ann Arbor, MI, USA) 235

Diary of Events 253

Vol. 28, No. 3 (December 1992)

Incentives for overhead cost reduction: Setup time and lot size considerations
G.G. Hegde and N.J. Nagarajan (Pittsburgh, PA, USA) 255
Impact of electronic data interchange technology on quality improvement and inventory reduction programs: A field study
S. Kekre and T. Mukhopadhyay (Pittsburgh, PA, USA) 265
Improved lot sizing heuristics for multi-stage inventory models with backlogging
J. Vörös (Pécs, Hungary) and S. Chand (West-Lafayette, IN, USA) 283
Expectation-variance analysis of job sequences under processing time uncertainty
P. De, J.B. Ghosh and C.E. Wells (Dayton, OH, USA) 289
Timing the control point under the exponential stationary process
L. Friedman (Beer-Sheva, Israel) 299
The optimal mix of flexible and dedicated manufacturing capacities: Hedging against demand uncertainty
D. Gupta (Hamilton, Canada), Y. Gerchak (Waterloo, Canada) and J.A. Buzacott (North York, Canada) 309
Impact of external factors on organizational performance
M.K. Kolay and K.C. Sahu (Kharagpur, India) 321

Forum
Engineering changes and time delays: A field investigation
G.G. Hedge (Pittsburgh, PA, USA), S. Kekre (Rochester, NY, USA) and S. Kekre (Pittsburgh, PA, USA) 341
